

800MT-X LS

Built for Adventure, Now More Accessible

Introducing the 800MT-X LS – the same rugged DNA and off-road capability as the standard 800MT-X, now with a more accessible low-seat configuration. Designed for riders who prefer a lower seat height for greater confidence and control, the 800MT-X LS retains all the features that make this bike a true adventure weapon – just re-engineered for a better fit. Whether you're a shorter rider or simply value surefooted handling on technical terrain, the 800MT-X LS opens up the world of adventure riding like never before.
